- Motivated, accountable and collaborative team worker.

EDUCATION

BACHELOR'S PASS
Springs Boys' High School
Grade 12 - 2019

NATIONAL DIPLOMA IN
COMPUTER SCIENCE
Tshwane University of
Technology
2020 – 2024

PROFFESIONAL SUMMARY

A confident young professional male with a passion for learning and developing. Eager to leverage the world of software development to support the growth and success of this high-performing industry. Committed to continuous improvement and achieving team success.

PROJECTS

LOAN SHARK MANAGEMENT SYSTEM (AVAILABLE ON GITHUB)

A digital platform developed to assist loan sharks in effectively managing their lending operations. The web application was developed in Java utilizing Bootstrap for web design, Thymeleaf for nice looking templates, SpringBoot Framework for the creation of robust backend operations, Postgresql for secure storage and management of data

BUS TRACKING SYSTEM (bustrackingsystem.kesug.com)

A mobile system developed to assist TUT students that stay on accredited residency (2KM or more away from campus) and need to catch a bus to and from campus. The system helps monitor the buses by providing details of the bus, location of the bus, details of the bus driver and the estimated time of arrival of the bus. The system was developed in PHP using tools such as HTML, CSS, JavaScript, MySql, JSON and Geolocation API.

EXPERIENCE

CYBAUG (PTY) Ltd – Mobile and Web Application Development Intern:

Collaborated with the development team on real-world projects, building and maintaining mobile/web applications.

Utilized MySql databases and PHP for backend system development.

Gained experience with Dart for Flutter development.

Participated in team meetings, brainstorming sessions, and code reviews to contribute to team success and skill growth.
